Frozex
Group

Our Vision

To lead the transition toward responsible and sustainable sourcing of fresh and frozen food for the global food markets

Our Mission

To source, process, and supply fresh and frozen food through controlled, compliant, and sustainable operations, delivering consistent quality and food safety to the international partners.

Our Story

Founded in 2018 as **Al-Farida Establishment**, the company was established with a clear objective: to deliver high-quality food solutions with strong nutritional value, grounded in scientifically supported agricultural practices. From inception, the organization implemented internationally recommended agricultural requirements and modern farming methodologies to ensure product quality, safety, and consistency across the value chain. Operations extended beyond cultivation to include rigorous supervision of post-harvest handling, processing, and packaging, minimizing quality loss and safeguarding nutritional integrity.

To ensure accountability and compliance, the company developed a structured monitoring and guidance system supporting all production stakeholders. This framework was aligned with internationally recognized agricultural and food safety standards, reinforcing operational transparency and traceability.

In Jan 2026, as part of a strategic growth and capital expansion initiative, the establishment transitioned into a joint-stock company under the name **Frozex**. This transformation marked a new phase of institutional maturity, expanded operational scale, and structured engagement with regional and international markets.

Why Frozex?

Delivering trusted, high-quality frozen food solutions through innovation, integrity, and international standards.

Integrated Farm-to-Market Supply Chain

From agricultural consulting and farm management to processing, packaging, and international export, we ensure consistent quality and reliability.

Strict Quality Control & Full Traceability

Monitored from raw material selection to final export with structured quality control checkpoints to ensure safety, consistency, and transparency.

8+ Years of Industry Experience

A legacy of expertise, innovation, and commitment to excellence in the frozen food industry.

Reliable Cold Chain Logistics

Temperature-controlled storage and transportation protect product integrity from harvest to international delivery.

Strong Production Capacity

~6,000 tons per product annually, ensuring scalability and dependable supply for global markets.

Flexible Product Customization

Tailored solutions for customized cuts, calibers, special mixes, packaging formats, and private label options based on customer needs.

Premium Quality & Food Safety Standards

Certified with HACCP, BRC, ISO 9001, ISO 22000, GlobalG.A.P., and FDA compliant systems.

Consistent Year-Round Supply

Through strategic crop planning and strong partnerships with growers, we ensure stable production and dependable supply across seasons.

Advanced IQF Freezing Technology

Rapidly freeze at peak freshness to preserve natural taste, texture, color, and nutritional value while extending shelf life.

Long-Term Partnership Approach

We focus on building long-term partnerships by delivering reliable quality, transparent communication, and responsive service.

What We Deliver ?!!

Agricultural Consulting & Farm Management Services

Precision from Soil to Harvest

Strategic Farm Assessment: Soil, water, and land analysis to define optimal crop direction.

Production & Crop Planning: Seasonal variety selection with expert-led yield and quality targets.

Performance & Climate Intelligence: Data-driven monitoring of productivity, waste, and weather patterns.

Nutrient & Crop Protection Strategy: Optimized fertilization and preventive pest control aligned with export standards.

Precision Scheduling: Structured planting and harvesting to stabilize supply and reduce market risk.

Resource & Energy Optimization: Smart irrigation systems and solar-powered solutions to lower costs and increase efficiency.

Food Processing "IQF"

Individually Frozen. Naturally Preserved.

Our Individual Quick Freezing (IQF) technology preserves freshness, texture, and nutritional value by rapidly freezing products at peak maturity. This process minimizes cellular damage, maintains product integrity, and ensures extended shelf life without compromising quality.

By combining advanced freezing systems with strict food safety protocols aligned with global standards such as BRC, HACCP and ISO, we deliver safe, consistent, export-ready products to international markets.

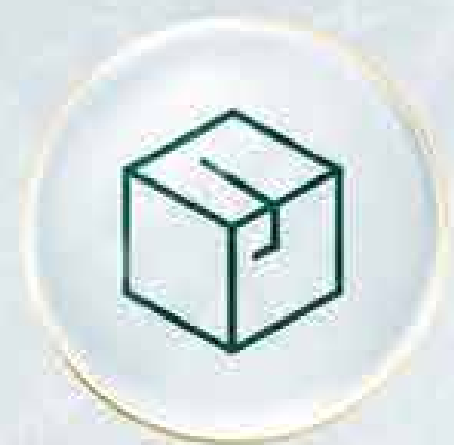

Packaging Solutions

Engineered Protection. Market-Ready Presentation.

Our packaging solutions are designed to protect product integrity while enhancing brand presentation and logistics efficiency. From bulk industrial formats to retail-ready packaging with our partners private label we ensure durability, traceability, and compliance with international food packaging standards.

Through optimized material selection and cold-chain compatibility, we support product stability from processing facilities to global distribution channels.
